

**PATA CHEMICALS
AND MACHINERY CO., LTD.**

Wastewater Treatment

We provide high-performance
chemicals of water treatment
under the name
"PW CLEAN"

Customer Savings

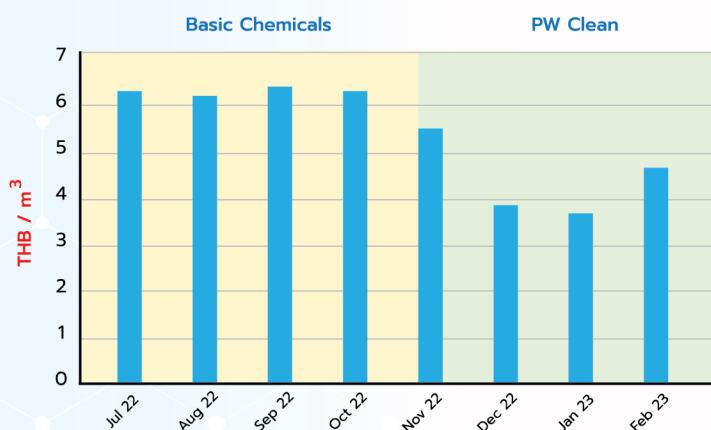

Treatment cost

Wastewater that is treated by special chemicals
program saves **treatment cost to 23%**

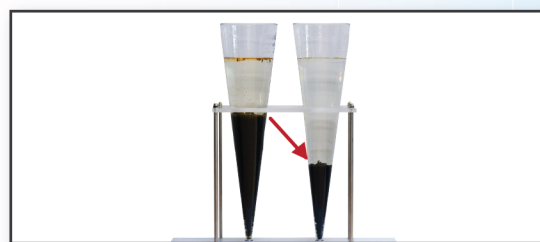

Sludge disposal cost

Sludge after treatment by special chemicals
program **reduces 46%** compared with
normal program, making saving sludge disposal cost.

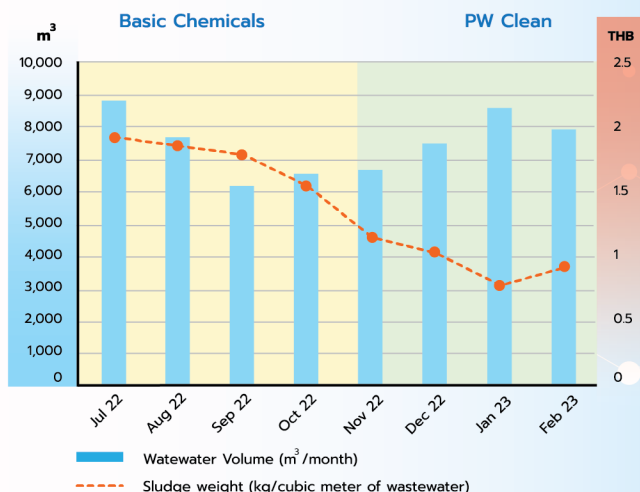

Treatment cost

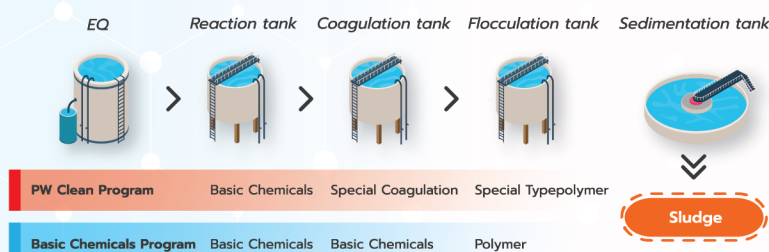

Sludge reduction **46%**

Sludge disposal

Process comparison

* Sodium Hydroxide and Sulfuric Acid are used for pH adjustment at both programs.

Analytical Equipments

We are professional to analyze and inspect customer's wastewater conditions and wastewater treatment processes accurately to offer more efficient treatment via well-trained and experienced chemists.

- Wastewater Inspection
- Experienced Chemists
- Conditional Analysis

Jar-Tester

DR 3900
Spectrophotometer

pH and
Conductivity meter

Services

- Follow up as after-sales service. Adjust chemical conditions
- Adjust chemical conditions to get along with customer processes.
- Solve problems relating to chemicals usage for 24/7.
- Consult for wastewater management system by expert team.
- Train workers to control chemicals correctly and efficiently.
